

Introducing TelaFuel[®] Smart Compliance[™]

Tell me how it works.

TelaFuel Smart Compliance is a robust software tool that enables environmental compliance managers with a cost effective means to monitor underground storage tanks, generate and maintain compliance reporting, and efficiently respond to and track environmental alarms.

Smart Compliance supports configured polling of Automatic Tank Gauges (ATG's) to gather tank tightness test results, line and sensor status, and alarm information across dial-up or IP networks. Email based alarm notifications are provided to track priority alarms from detection to closure. Alarm notifications are easily configured to individual user specifications.

The system includes a powerful management reporting capability to summarize company or regional compliance status across multiple locations, to review detailed site level compliance summaries, to analyze inventory control (BIR), and to evaluate sensor status and alarm history.

What are the benefits?

TelaFuel Smart Compliance customers achieve measurable improvements in their environmental management operations. Typical customer benefits include:

- Reduce non-compliance events and associated fines
- Easily gather and maintain a history of detailed site level compliance reports in one place
- Improve response time and track closure of priority environmental alarms
- More efficient compliance process results in increased productivity for environmental personnel

All TelaFuel solutions are provided as hosted, on-demand software services that significantly reduce time-to-benefit without up front capital investment or costly I/T infrastructure and support.

Where can I find more information?

TelaPoint is the leading provider of Internet-based fuel inventory and order management, purchasing, invoice reconciliation and wireless fleet scheduling solutions in the Petroleum and Convenience Store industry.

TelaFuel solutions are industry proven and in use by many leading convenience store, travel center, hypermarket, wholesale marketing and bulk carrier companies throughout the United States.
