

## Introducing TelaFuel<sup>®</sup> Smart Mobile<sup>™</sup>

### *Tell me how it works.*

TelaFuel Smart Mobile is a robust software tool that allows you to communicate with a driver the ever changing dispatch information wirelessly to a Microsoft Mobile device. The driver can now document the actual lifting & dropping information on the device that is communicated in near real time to update the TelaFuel system.

Smart Mobile supports complex orders with multiple supply sources and multiple destinations. Site inventory levels are accessible from the mobile device allowing the driver to load what will fit; making retains a thing of the past. Our new offering supports freight settlement charges and customer signature capture. No more waiting for paperwork that slows down billing and driver payroll.

The system includes a powerful management reporting capability to measure inventory levels, monitor inventory high and low exceptions, manage excess inventory, view orders by status, review scheduled orders, analyze average load sizes and handle split / retain activity.

### *What are the benefits?*

TelaFuel Smart Mobile customers achieve measurable improvements in their fuel replenishment operation. Typical customer benefits include:

- Reduction in cycle time for billing and payroll
- Optimizing inventory results in sizeable reductions in excess in-ground inventory
- Improving delivery results in notably fewer run-outs, diversions and split loads
- Increasing average load sizes hauled results in lower transportation costs
- More efficient dispatching results in increased productivity per dispatcher

All TelaFuel solutions are provided as hosted, on-demand software services that significantly reduce time-to-benefit without up front capital investment or costly I/T infrastructure and support.

### *Where can I find more information?*

TelaPoint is the leading provider of Internet-based fuel inventory and order management, purchasing, invoice reconciliation and wireless fleet scheduling solutions in the Petroleum and Convenience Store industry.

TelaFuel solutions are industry proven and in use by many leading convenience store, travel center, hypermarket, wholesale marketing and bulk carrier companies throughout the United States.
