

Introducing TelaFuel® Smart Schedule™

Tell me how it works.

TelaFuel Smart Schedule is a robust software tool that enables customers who own transportation resources an efficient means to visually assign fuel orders to trucks and drivers. Dispatchers can easily schedule fuel orders to internal trucks and drivers across multiple dispatch markets, hand-off overflow orders to outside carriers and transfer orders to other dispatch markets to balance work across all internal and external resources.

Smart Schedule organizes and prioritizes unassigned fuel orders into "Must Go", "Might Go" and "Must Wait" categories and provides powerful drag and drop tools to assist dispatchers in scheduling work in less time with fewer mistakes. The system provides calendar-based schedules for maintaining driver work schedules and planned truck maintenance. Smart Schedule also provides utilization statistics for individual resources and entire dispatch markets.

The system includes a powerful reporting capability to print Driver Delivery Schedules, Carrier Delivery Schedules, Dispatch Market Delivery Logs and individual Customer Delivery Tickets. Optionally, Smart Schedule can be synchronized with TelaFuel Smart Mobile to provide real-time communication between dispatchers and drivers.

What are the benefits?

TelaFuel Smart Schedule customers achieve measurable improvements in their transportation scheduling operations. Typical customer benefits include:

- Efficient scheduling of transportation resources in less time with fewer mistakes
- Optimized utilization of both internal and external transportation resources
- Improved ability to respond to unplanned driver or truck events
- More efficient scheduling results in increased productivity per dispatcher

All TelaFuel solutions are provided as hosted, on-demand software services that significantly reduce time-to-benefit without up front capital investment or costly I/T infrastructure and support.

Where can I find more information?

TelaPoint is the leading provider of Internet-based fuel inventory and order management, purchasing, invoice reconciliation and wireless fleet scheduling solutions in the Petroleum and Convenience Store industry.

TelaFuel solutions are industry proven and in use by many leading convenience store, travel center, hypermarket, wholesale marketing and bulk carrier companies throughout the United States.
